

Be my guest[®]

STEP INTO A QUIET RETREAT

A phone booth that meets all the needs of today's workplace — **a quiet retreat** to focus or talk in private.

Be my guest® helps maximise productivity, frees up meeting room space, is quick and simple to assemble and easy to move around.

Our most competitively priced phone booth, Be my guest® showcases the quality and attention to detail that Orangebox is renowned for, carefully balancing considered design with ease of assembly and cost.

Form and function have been distilled to its essence – resulting in **elegant simplicity** and optimal performance.

Your quiet retreat in a busy workplace.

Be my guest® is a quiet retreat where you can confidently talk in private without distracting others or being disturbed. The perfect space for private phone calls, online meetings or a sanctuary for focussed work.

The acoustic felt and laminated glass door, which is Class B rated, is fitted with magnetic seals, absorbing sound inside the phone booth – while at the same time blocking out external noise.

Be my guest® is
designed to be quick
and simple to assemble.
All you need is:

1 tool
2 people
30 minutes

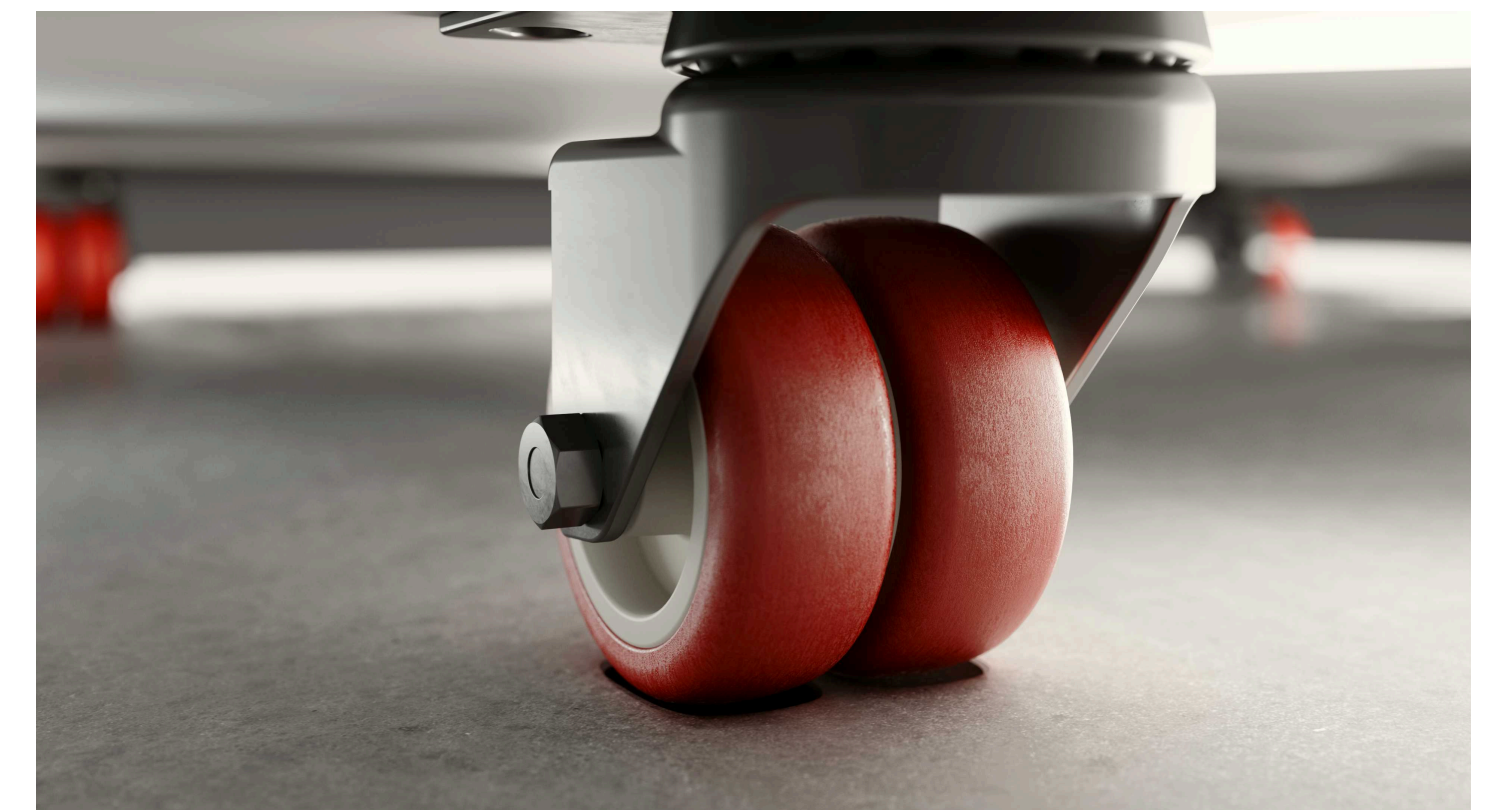

Easy to move.

If you want to reconfigure your existing workspace, integrated castors make the phone booth easy to move. Simply wind up the feet to engage the castors to move your phone booth, and wind down to secure it when in position.

The phone booth is just as easy to disassemble if you decide to relocate in the future.

**Intelligent engineering.
Carefully considered materials.**

Mix and match. Make it your own.

With multiple colours and finishes, the choice of solid natural oak or stained black door handles, and the option of a D-shaped or L-shaped worksurface; Be my guest® can be configured to complement your workplace as a design feature.

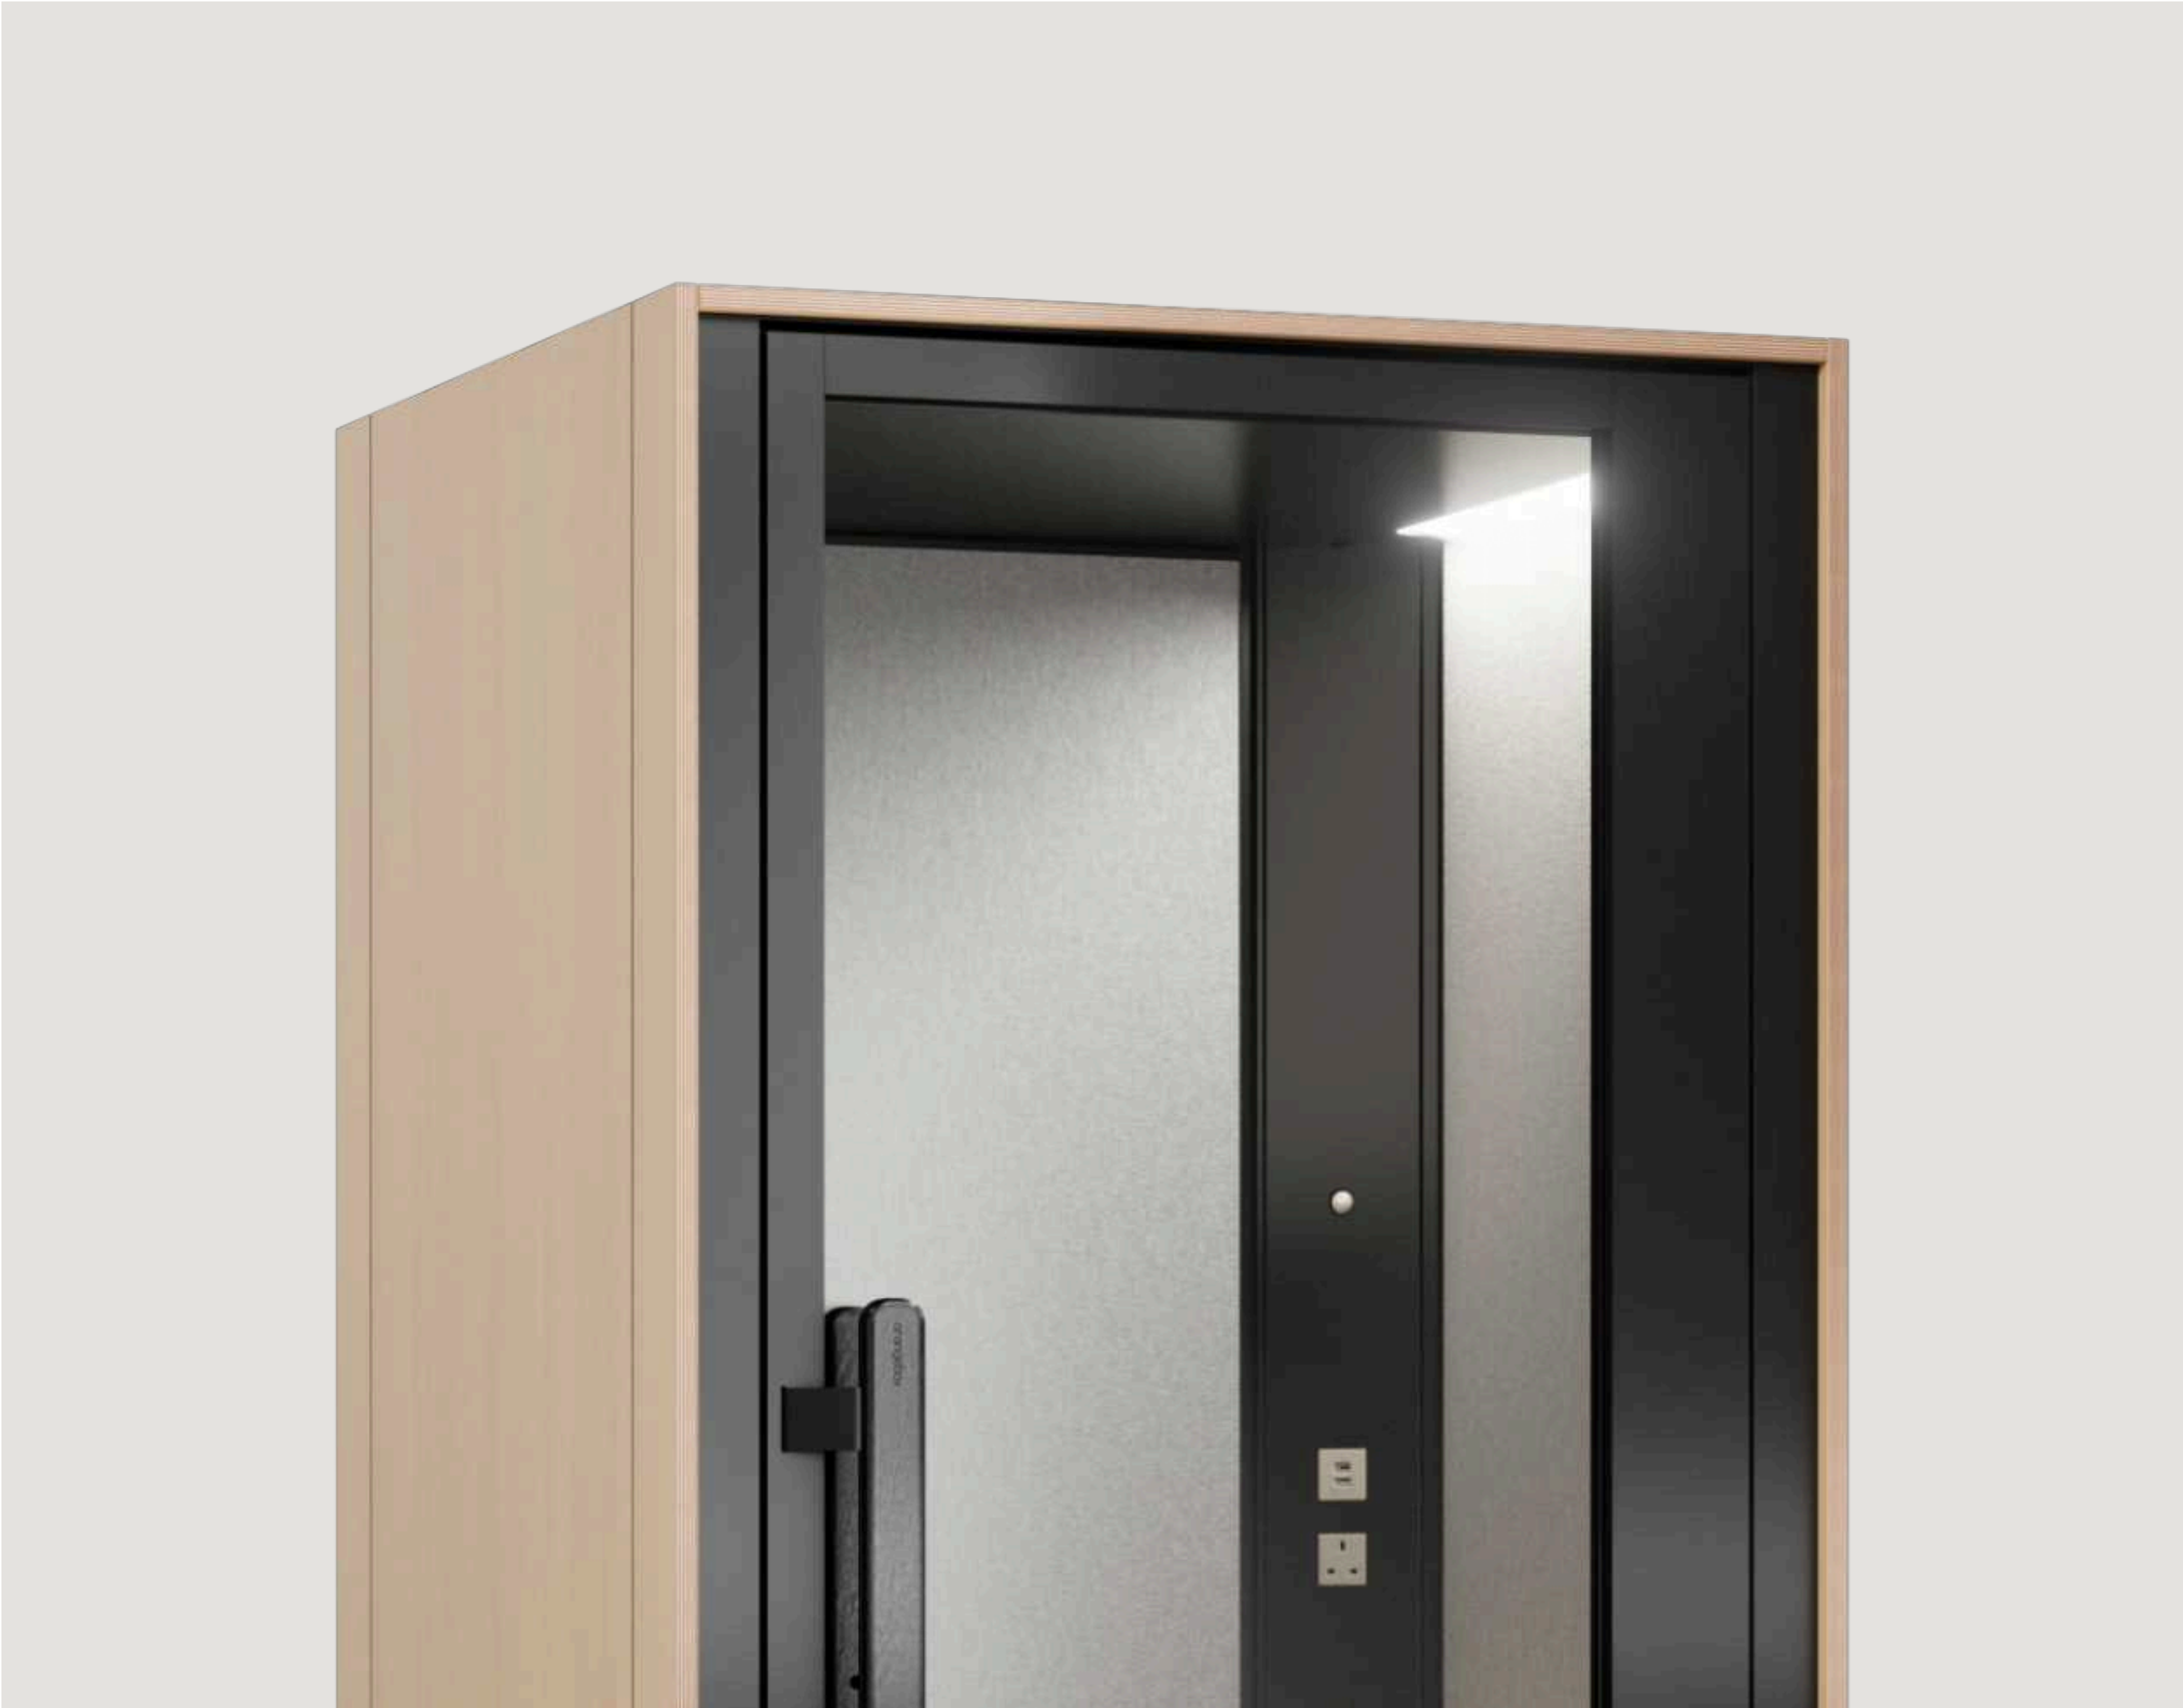

Add our signature designed 'kink' for extra privacy and character, match it or contrast it with the side walls and worksurface.

Customise your work surface.

The work surface comes in different colours and materials and can be installed at either seated height [74cm] or standing height [105cm].

It offers plenty of space for a laptop and has an integrated device holder. Options include a D-shaped work surface or a L-shaped work surface providing additional space for your belongings.

Stay powered up and save energy.

Diffused lighting sets the perfect mood for video calls – the sensor activates as you enter the phone booth and saves energy by automatically switching off after use.

Stay powered up with USB-A and USB-C outlets, in addition to regional sockets.

Keep cool and collected.

The sensor activated smart ventilation system keeps you cool and refreshed at all times with approximately 40 air changes per hour. The quiet fans continuously move cool air in and draw hot air out when in use.

Be my guest® sets the benchmark for compliance with every part rigorously tested.

Designed and engineered to last, with a 5-year warranty (and 2-year electrical warranty).

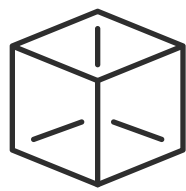

A quiet retreat away
from the hustle and
bustle of the workspace

Be my guest®
Connecting Spaces

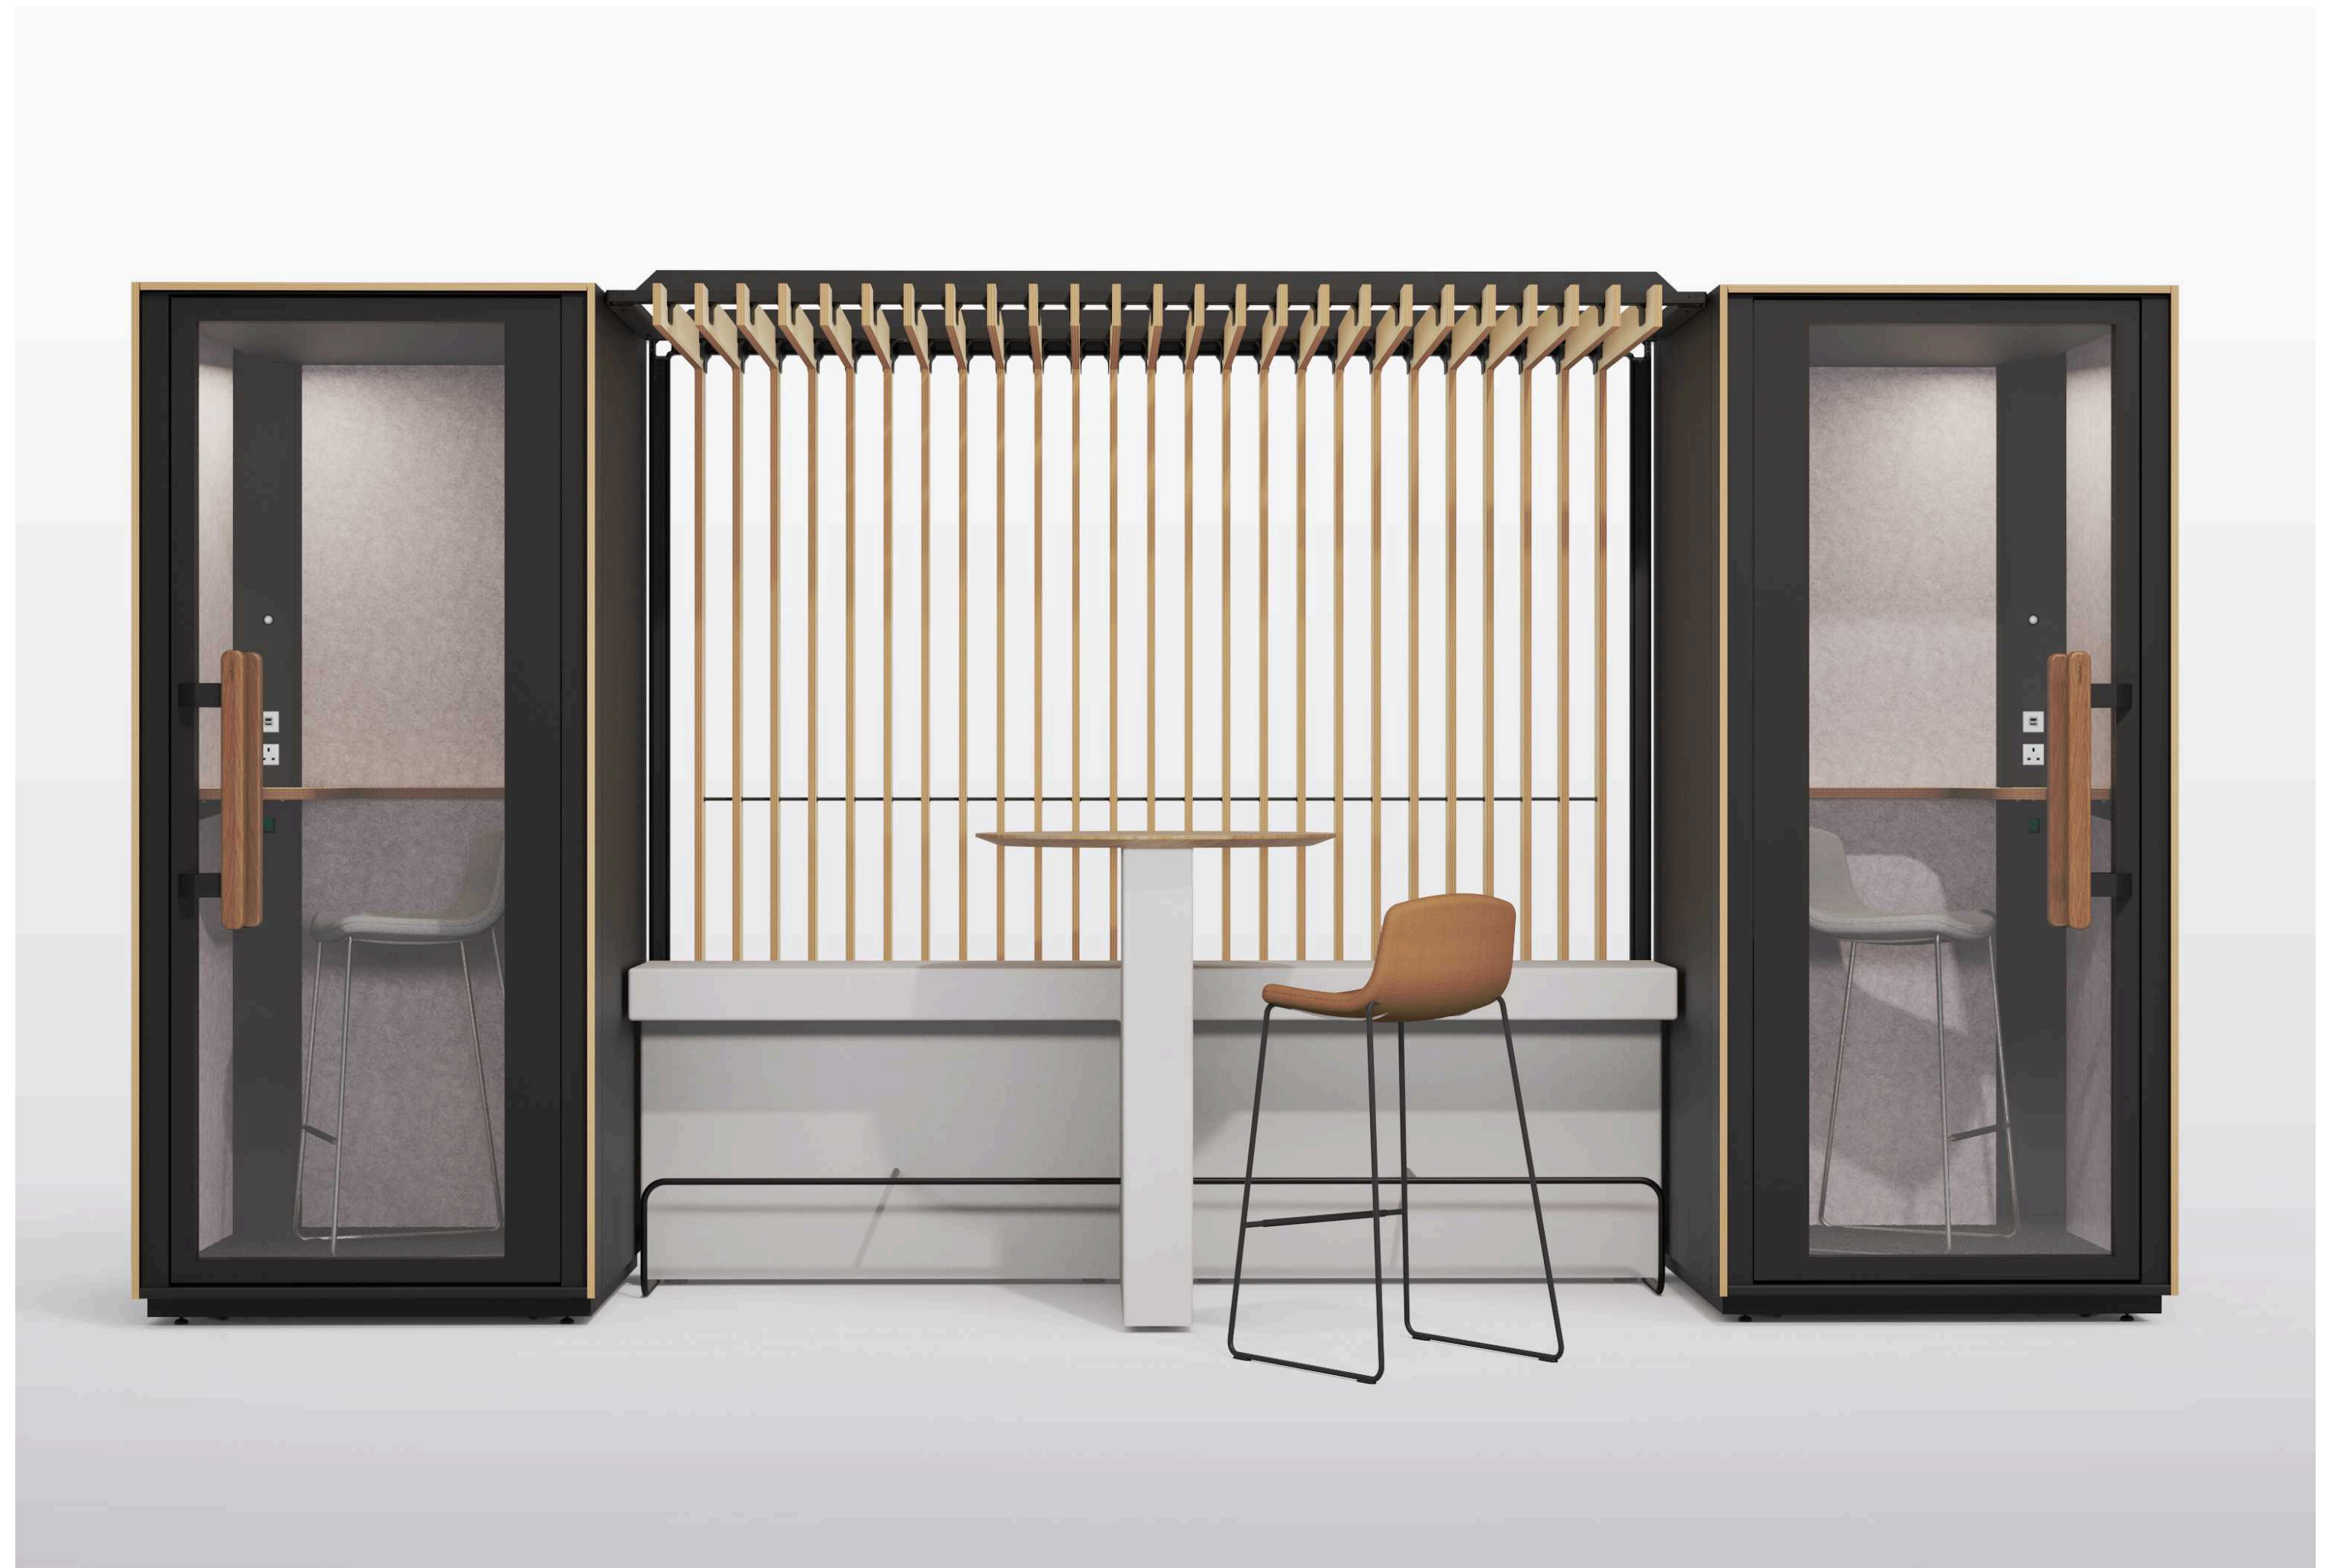

Be my guest – connecting spaces reimagines Be my guest® with a flexible, scalable, and quality design solution tailored for the modern workplace.

Designed to meet diverse privacy needs, the fully customisable system prioritises user comfort while blending seamlessly into any interior – making it the ideal choice for organisations, designers, and users alike.

By creating a neighborhood of spaces with varying levels of acoustic and visual privacy, Be my guest – connecting spaces redefines and enhances the workspace.

It intuitively meets users' needs by supporting private calls, quiet focus, and both virtual and in-person collaboration.

With fully enclosed, semi-open, and open configurations, Be my guest – connecting spaces adds functionality and flexibility into any environment.

Available at two widths:
1.5m and 2.45m

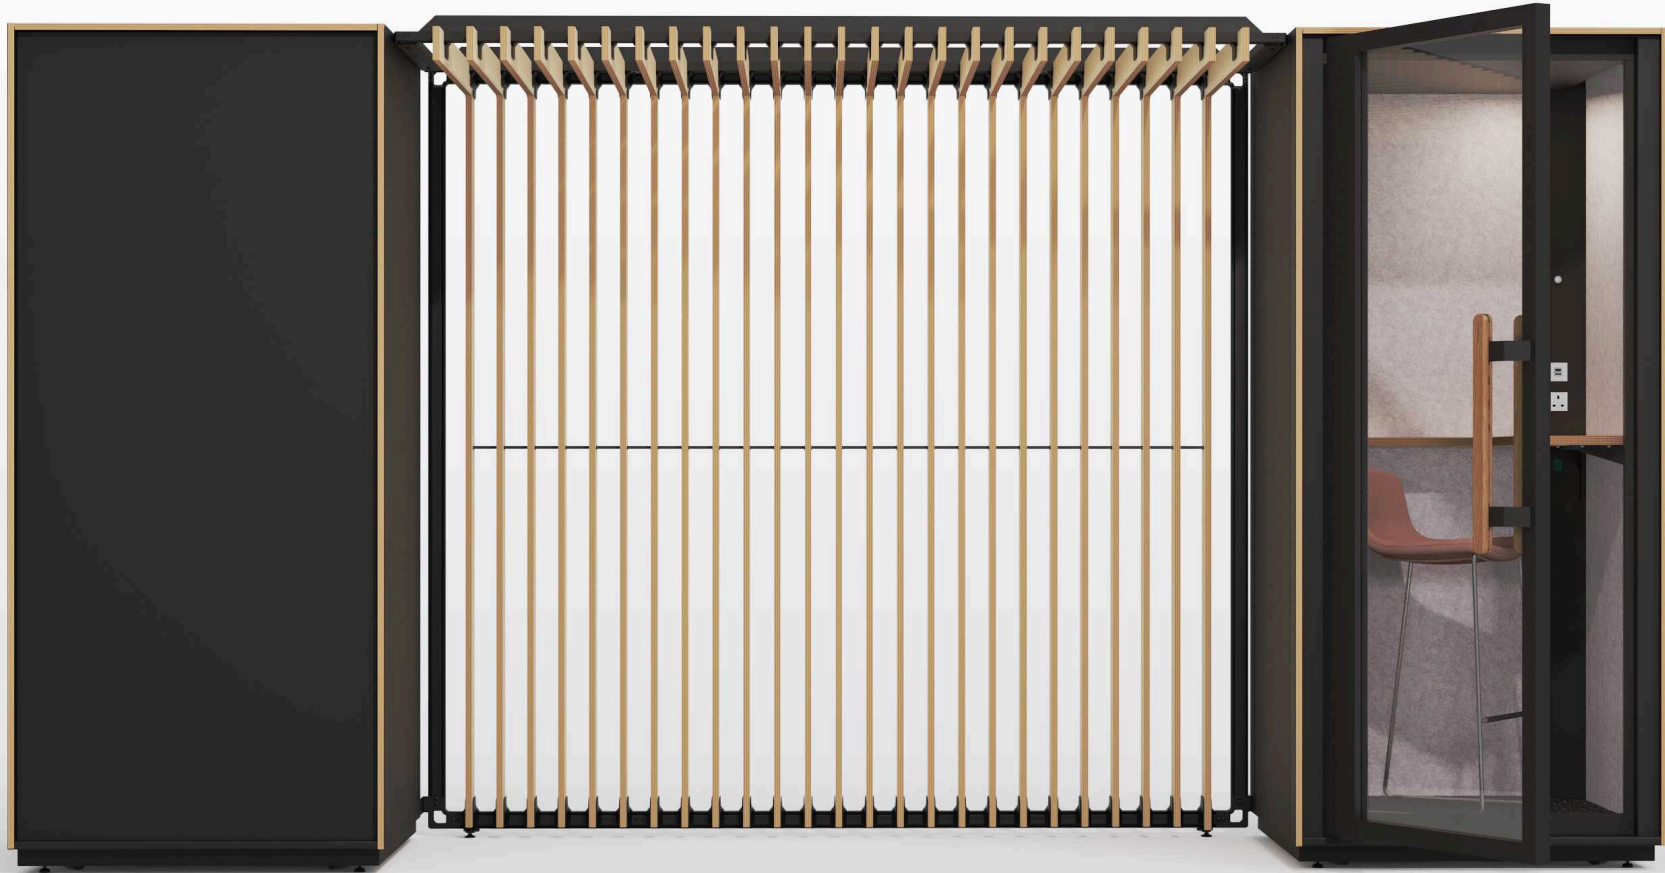

Designed to scale seamlessly, Be My Guest – connecting spaces can connect and cluster, allowing designers to integrate phone booths into larger configurations that align with overall interiors.

The Canopy

A slated plywood roof that transforms the interconnected space between two phone booths into an intuitive landing point for users to connect and collaborate.

The Wall

Used together with the Canopy, the Optional Wall utilises the negative space between two phone booths by creating an inviting environment for individuals or groups to gather and engage.
